

SEI Group Inc., awarded contract as member of the RMS AFCAP Team

This past November, The RMS AFCAP Team won one of the six contracts awarded for AFCAP III. SEI has successfully supported RMS on the 2 previous contracts.

AFCAP fulfills an Air Force need to augment Civil Engineer and Services capabilities supporting worldwide contingency planning and deployment operations, principally in military operations other than war. These requirements include: construction support at existing overseas locations to expand operational capability or replace war reserve materiel assets expanded during extended military operations; base recovery operations as a result of natural disasters, accidents, or terrorist attacks; and augmenting base sustaining forces at any Air Force base worldwide from which Civil Engineer and Services forces have been deployed.

Mr. Eloy Torrez, President, SEI Group Inc., stated in a press release announcing the award "Congratulations and Job Well Done to all that were involved, and SEI looks forward to continued success supporting our national objectives through AFCAP III."
